

Lab 5: ReactJS. (5 points). Due March 10, by 5pm.

1. Use this link to get the github repo: <https://classroom.github.com/a/5uqWZv7G>
2. Create/update the .gitignore file.
3. Create a ReactJS app using vite with the template, using the npm command found on slide 5 of react 1 lecture.
4. Likely removing most of the template code in app.jsx file, you are going to create a simple form that has at least 2 inputs and submit button. You will need state for the input form.
 - a. The submit button should add them to a variable in the app (no databases needed).
 - b. Then display the new data as well.
 - i. For reference see the r2 lecture near the end of the lecture for examples

Turn in:

1. Make sure the readme has been updated, name, lab5.
2. Update the AI use section
3. Add a description of website, how it works, and screen shots showing it works.
 - a. At 2 screen shots, Data in the form and then data being displayed after clicking submit.
4. Finally make sure you push everything to get github.
