

Lab 7: Setup and basic flutter

1. Use this link to get the github repo: https://classroom.github.com/a/qN_4fDR6
2. Update the README with your name and lab 7
3. Using Android studio or Visual Studio Code, create a project.
4. Get a basic app working something like a helloworld app.
 - a. An input box and button,
 - b. When the user presses the button, it will say hi to name in the input box.
 - i. How the name is displayed is up to you.

Turn in:

1. Make sure the readme has been updated, name, lab7.
2. Update the AI use section
3. Add a description of app, how it works, and screen shots showing it works.
 - a. At least 2 screenshots, one show the name in the input box, the second after button has been pressed displaying hi name.
4. Finally make sure you push everything to get github.
